DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Medina et al (Biotechnology Techniques, 1997) for the reasons of record.

In response to this rejection, Applicants argue that Medina et al fails to disclose measuring a secondary signal where the secondary comprises a further increase or periodical change of a baseline measured from the primary signal. Applicants also argue that unlike the instant invention, Medina et al shows recorded signals that reflect a decline from baseline after injection.

Applicant's arguments have been considered but are not convincing. As set forth in the previous office action, a primary and secondary signal are disclosed in Medina et al. Looking at Figure 2 of Medina et al, the signals measured at the end of injection for each of the 4 concentrations of injected IgG (i.e. secondary signals) are all higher than the primary baseline signal measured at the start of injection. Thus, the secondary signal in Medina et al reads on the secondary signal recited in the instant invention.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 5,965,456 discloses a surface plasmon resonance biosensor with a flow channel that delivers a continuous flow of sample to a sensor region.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
